

**No Page Number: Worksheet for online answer form** (right after title page)

Add: 48\_\_\_\_\_

**Page 8**

Under “Using *eLibrary* efficiently,” the following are the complete instructions for numbers 3 & 4:

3) **replace** NetLibrary eBook collection with EBSCOhost eBook collection.

4) **replace** text with:

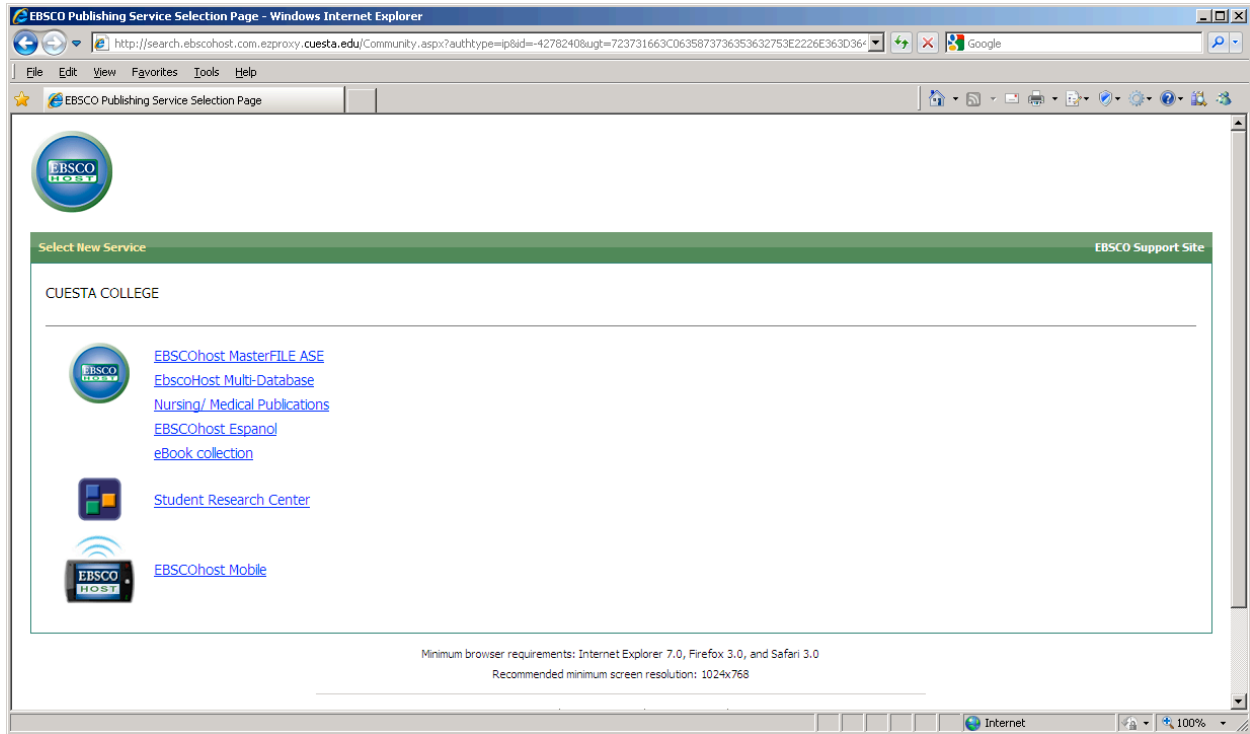

Scroll down the page to ***Sustaining life: how human health depends on biodiversity*** by Eric Chivian. Use the entry with the call number QH541.15 B56 S96 2008, not the entry farther down that says ONLINE.

**Pages 10-11**

Finding Cuesta’s eBook Collection

- The Cuesta eBook collection has more than 13,000 full text books you can access online.
- eBooks are available 24/7, and you can use them when the library is closed. There are many recent titles in every subject available online through *EBSCOhost*.
  1. From the myCuesta portal, log in and select the **Resources** tab for the Library channel. Beneath the **Find a Book** search box, choose: **For eBooks search EBSCOhost**. This link takes you to the *EBSCOhost* opening page. Choose **eBook collection**.
  2. Type the name of the book *Urban Habitats* into the search box and select *Search*. Find the title. Choose **eBook Full Text**. If you can’t get in, someone else might be using the book. Try again later, or look at another eBook by choosing another book from the list. Notice that you can also choose to view just the Table of Contents for the book.
  3. You can also find *EBSCOhost* eBooks through the *eLibrary* catalog, while you are searching for print books. eBooks are listed in the Cuesta book catalog along with print books.

## The Cuesta EBSCOhost Search Page

4. When you get to *Urban Habitats*, or any eBook, the left side of the page shows the Contents in an expandable list, while the right side shows the text.
5. On the left side, select the + sign in front of URBAN HABITATS.
6. You can look at the entire Table of Contents, browse the chapter headings, go to a particular page, or read the book page by page by selecting the **Go arrow** at the bottom of the screen. You can also zoom in or out, and read the book full screen.
7. Look at the **Tools** on the right of the page. You can print pages, email pages, and include the book in a folder with other books to use later. Printing from online eBooks is restricted by copyright. However, you will be able to print quite a few pages.

#### 4. Which of the following is true of the *EBSCOhost* eBook collection?

- a. The eBook collection is available 24/7
- b. You can access eBooks remotely
- c. eBooks are books published on the Web from an individual's page
- d. a and b

**5. Which of the following can you do using the *eLibrary catalog*?**

- a. You can find books, eBooks and videos in Cuesta's library
- b. You can find online journal articles
- c. You can watch DVDs
- d. You can access newspaper articles
- e. a and c

**Page 22**

First paragraph under EBSCOhost Periodical Database heading should have the following sentence added: **EBSCOhost is also the eBook entry page.**

**Page 23**

To answer the EBSCOhost questions:

From myCuesta, under **Find an Article: Databases**, choose *EBSCO*. The same directions apply for finding *SIRS*, *ProQuest NNI*, and *NewsBank*. From the Library page, under **Find an Article: Databases**, select **Journal** or **Magazine**. Choose *EBSCOhost*.

- 1) Select **General databases: MasterFile Premier and Academic Search Elite** from the list of choices. Select **Continue** on the **Choose Databases** page to get to the basic search screen (see above). Type in the keyword phrase **habitat conservation** and choose **Search**. You get a list of articles.

**Page 25**

change the text of the following numbered paragraph to the following:

5. Right above the search box you can change or add databases to your search. Click on **Choose Databases** and add MasterFile Premier to the Academic Search Premier database you are already searching. Choose **Okay**. You want to narrow your search to conservation in a single country. In the **Search** box type in the following: **habitat conservation AND Canada**.

**Pages 25-26**

6. Check **Full Text** before hitting **Search**. Notice the number of results you get.
7. By linking the two keywords or phrases with **AND** as a connector, *EBSCOhost* will find articles that connect these terms. Only articles about conservation and Canada will come up. Boolean searching allows you to fine tune your subject, saving you time and returning better results.

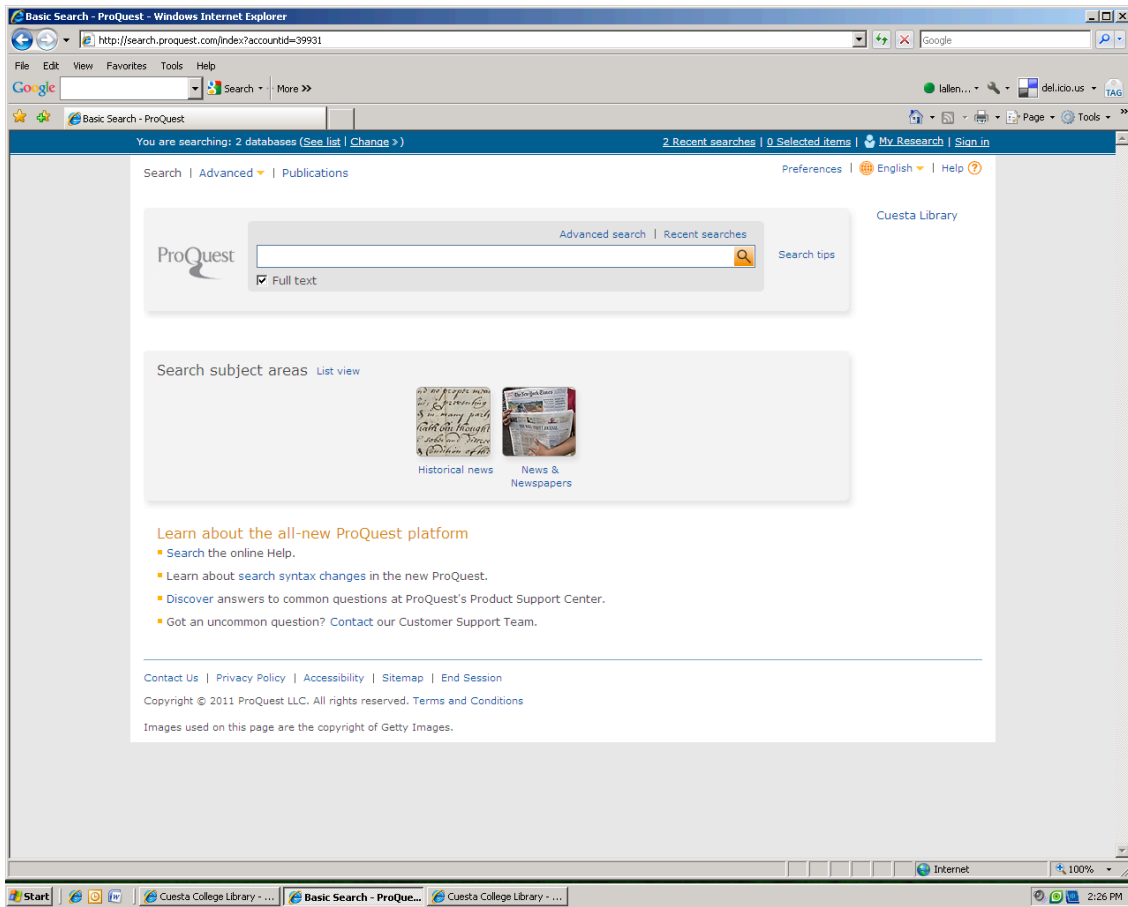

8. You also want only quality articles from academic journals. On the left side of the page under **Source Types**, check **Academic Journals**.
9. Select **Update**.

**Research Tip:** Academic journals are one of the best sources for research papers. They also include some primary source documents. Primary sources include original research, such as case studies, diaries, interviews, first-person accounts, etc.

**Some instructors will ask you to use academic journals for your research paper.**

- 18. After selecting Academic Journals from the Source Type box, how did the results change?**
- a. There were no results at all
  - b. There were more results
  - c. There was no change in results
  - d. There were fewer results

**IMPORTANT NOTE:** When you go to the online answer form the question will look different. Just choose the right letter for your answer. Don't worry about the text.

To answer the *ProQuest* questions:

1. Type the phrase **habitat conservation** in the text box.
2. Check the **Full Text** box.
3. Select the **Search** icon
4. You get a long list of articles which is too long to be useful. Above the results list there is a box called **Suggested Subjects**. This can help you narrow your search get better results. We don't want to use these particular subjects.
5. Go back up to the search box. Narrow your search by adding the words **AND California** to **habitat conservation**. This is Boolean searching again.
6. Make sure **Full Text** is still checked; choose the **Search** icon.
7. Since your assignment needs to deal with recent events only, change the **Sort results by...** on the right from **Relevance** to **Date (most recent first)**.
8. Open the article entitled "Rescue effort goes awry; a surprise die-off..." by clicking on the title or the **Full Text** icon below the entry.
9. *ProQuest* has a helpful **More like this** option on the right. If you wanted more articles on this particular subject you could find them simply by choosing **See similar items**.

10. Scroll down past the **Abstract** and **Full Text** article, and take a look at the **Subjects** field under **Indexing** (details). You can choose related topics from here.
